# IN CASE OF SURIMI AND KAMABOKO

- IGRECA started in Japan many years ago to transfer the usage of egg white powder from ham and sausage to surimi
- Such adaptation allows to process with new gel strength texture especially thanks to the high gel egg white powder
- When the crabstick (Kanikama) fashion has been adopted by the Western, Eastern countries and South East Asia, IGRECA has been supporting the new production plants by supplying the dedicated egg albumen powder

# 4 YEARS AGO IGRECA HAS SET UP AN EGG POWDER PLANT IN INDIA: EGGWAY

## EGGWAY

is supplying the growing Indian surimi industry

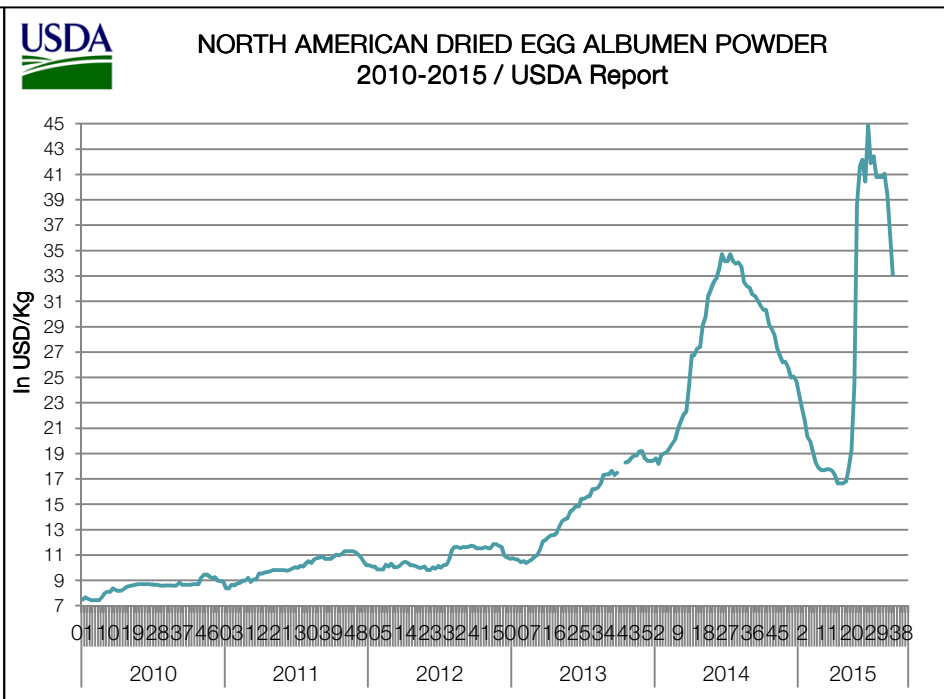

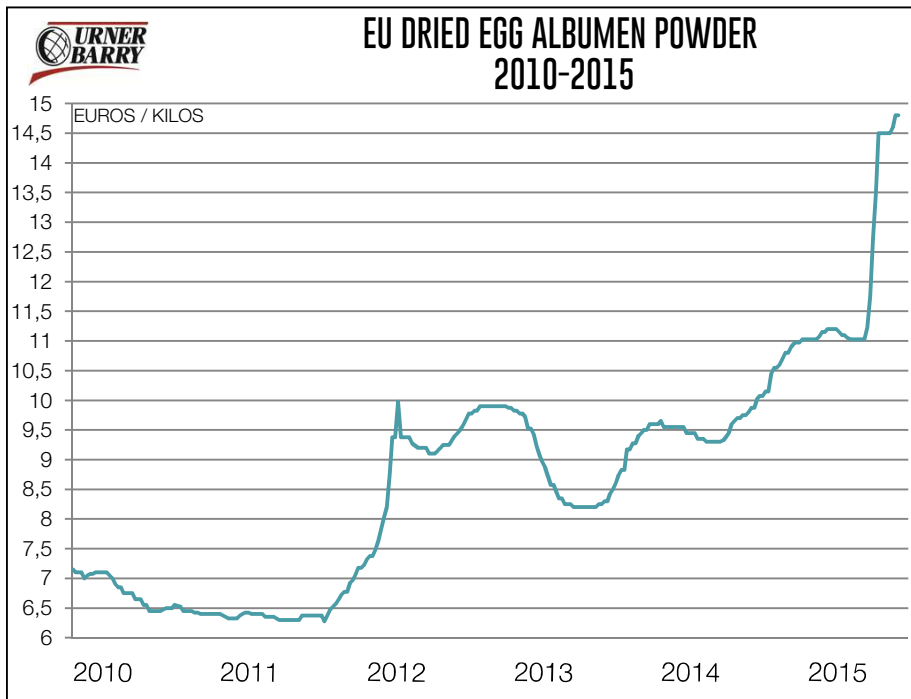

and South East Asian surimi plants

# ECONOMY AND MARKETING

## 2015

2015 main issue on the egg market has been the world largest AVIAN INFLUENZA outbreak affecting USA with 42 million layers dead, with a logical impact on the Egg albumen powder price.
